Aluminum Platform Trucks

Push the load, not the truck. Aluminum platform trucks are super light/all muscle, no deadweight. 40% lighter on average than steel or wood-and-steel trucks. Unitized box type frame is high strength all-welded aluminum channel. Corner sockets are integral with frame. Removable handle fits at either end of truck. 8" mold-on rubber tires with aluminum core offer good floor protection, quiet operation. 2,000 lb capacity. Shipped knocked down.
