## SPIDER SHELVING SYSTEM

Open Type Shelving

Closed Type Shelving

Door Unit Type Shelving

### AN INNOVATIVE AND VERSATILE STORAGE SYSTEM

With the new Spider shelving system, Rousseau has elevated performance standards in the storage industry to a new level. This system is the culmination of several years of research.

This modular storage system permits maximum use of available space in any surrounding: warehouses, parts stores, repair shops, etc.

To consolidate high density and traditional storage, Maximizer drawers can easily be incorporated into the Spider shelving system during installation or at a later date. An added advantage is that the shelving system can be combined with Mini-racking to store bulky or heavy items.

### THE ADVANTAGES OF SPIDER SHELVING

- **Exceptionally versatile structure** to which a large number of accessories may be added.
- **Functional design**, with unsurpassed attention to detail and appearance.
- **Load capacity and construction** meeting the requirements of every type of industrial or commercial enterprise.

In addition to the multiple applications offered, the Spider system can improve your efficiency by making maximum use of available space in accordance with your inventory turnover.

Note that the Spider system can be adjusted to suit your environment perfectly, either sideways or upwards. Satisfy short-term needs with the assurance that your storage system will keep in step with company growth.

Double tier and mezzanine can be obtained using Spider shelving to utilize full building height for maximum storage capacity.

Double Tier or Mezzanine System

# ROUSSEAU SPIDER SHELVING SYSTEM

**General Dimensions**

**COMPACT AND STURDY ASSEMBLY**

Assembly is easy: The shelves are fastened to the posts using 4 compression clips made of 14-gauge steel. As a result, shelving layouts can be changed quickly.

**UNIQUE AND SUPER-FUNCTIONAL POST**

The Spider common post, made of 14-gauge steel, is the cornerstone of the structure. It is designed to handle all load requirements found in current industrial settings. Its tubular T-shape offers up to 7 fixing zones for different applications. Its hollow centre allows components to be completely modular and to be installed without interference. The post is perforated on each side every 1", C to C, for optimum shelf adjustment and simplified storage space calculations. Two types of front finishes are available. The 'R' front is perforated to add Mini-racking or mezzanine components. The 'H' front is smooth surfaced, resulting in a neat appearance.

NOTE: R type posts are stocked for immediate delivery.

**INDUSTRIAL LOAD CAPACITY SHELVES**

The box-type shelves are made of 20-gauge steel with front and rear edges roll-formed and welded. Standard load capacity may reach 800 lb. depending on shelf size and 1,100 lb. with the addition of reinforcers.

Dimensions Shelf	  		
	Medium-Duty Capacity Without reinforcer	Heavy-Duty Capacity Central reinforcer	Extra Heavy-Duty Capacity Double reinforcer
3612	750	--	--
3615	775	--	--
3618	800	1000	1100
3624	625*	1050	1100
4812	550	--	--
4815	550	--	--
4818	575	725	1025
4824	600	750	1050

\*Capacity of 800 lb. with double flange or with SH22 side shelf reinforcers.

Load capacity tests are based on Shelving Manufacturer Association (SMA) standards. The capacities represent evenly distributed loads and are calculated using a 1.65 coefficient of safety. They are indicated in pounds.

• Shelving units shown are 36" wide. • All shelving units are available in 48" wide. • For 48" wide units add -48 to the end of the part number. (Example: 812S-48)

**Adjustable open shelving units provide a high strength, yet economical storage system for your plant, warehouse or office.**

Open type shelving starter units include the number of shelves required for your application, 4 T posts, 2 pairs of side sway braces and 1 pair of back sway braces. The add-on units are similar, except that only 1 pair of side sway braces and 2 posts are required.

**Closed type shelving units have all of the features of open shelving, while providing the added benefits of a fully enclosed unit.**

Closed type shelving starter units include the number of shelves required for your application, 2 end panels, 1 back panel and 1 base plate. The add-on units are similar, except that only 1 end panel is required.

- Shelving available from stock. • Let our experienced representative help you design and lay out your shelving requirements. • Complete shelving installation service available.
