STEEL STORAGE BINS

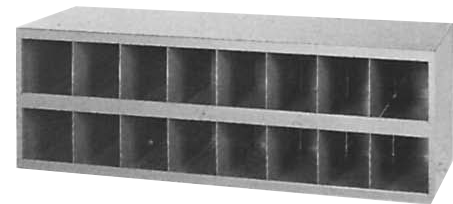

“Pigeonhole” type steel storage bin units organize small parts, making them easily accessible. These cabinets are best suited where space is limited and organization is crucial.

They are produced of prime cold rolled steel and will not warp, twist or sag. Fully hemmed label holders provide adequate space for content identification.

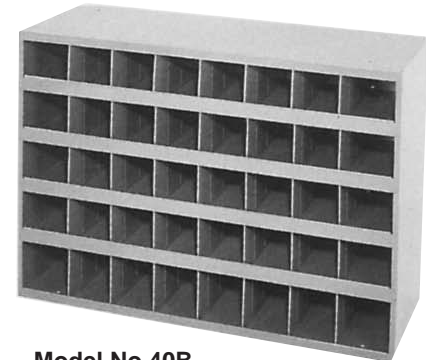

Each divider is hemmed in a tear drop design to avoid sharp edges, and vertical ribs provide added strength. Doors with padlock attachments and bases to raise units are available for use with most models. All units are 33³/₄" wide, and some are available in depths of 12" and 9". Units are fully welded and finished in grey baked enamel.
