

SPECIALTY BUBBLE PRODUCTS

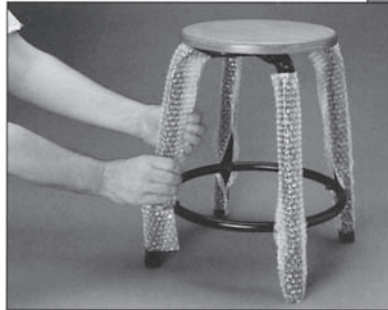

Cohesive Products

Adhere To Themselves, Not Your Products

Cold Seal® AirCap® CSC-120

Cohesive-Coated Cushioning

- **Superior, Lightweight Cushioning and Surface Protection** – Cohesive-backed 3/16" thick AirCap® heavy duty bubbles with a tough air retention barrier.
- **Reduces Packaging Time and Material Use** – Adheres instantly to itself for labor-efficient, tape-free application.
- **Greater Versatility** – Creates fast, easy packages or pouches, manually or on automated equipment, for a wide variety of products.
- **Highly Water-Resistant** – Withstands moisture better than kraft-backed foam.
- **Transparent** – For easy product identification and quality control.

Note: All Sealed Air® bubble cushioning products can be recycled at eight Sealed Air sites and at many independent recyclers. Recycling programs can also be arranged for individual companies.

Bubble Mask® SC-120

Adhesive-Coated Cushioning

- **Double Protection** – Combines the surface protection of adhesive masking with the cushioning protection of bubbles.
- **Saves Labor** – Applies easily without tape.
- **Increases Productivity** – Enables faster order processing.
- **Superior Cushioning Protection** – 3/16" thick AirCap® heavy duty bubbles with a tough air retention barrier that maintains thickness providing cushioning power longer and under greater pressure than non-barrier bubbles.
- **Conforms To Unusual Shapes** – Protects even hard-to-get-at places or can be used for "spot" protection.
- **Transparent** – For easy product identification and quality control.
- **Easy To Remove** – Comes off quickly and cleanly.
- **Can Be Reused Multiple Times** – Reduces solid waste and material cost.
