

INFLATABLE BUBBLE WRAP®

Inflatable Bubble Wrap® Packaging System

Automatically Inflates and Dispenses 3/4" Height Barrier Bubble® Material

Sealed Air® Barrier Bubble® technology provides the ultimate in cushioning protection.

On-Site, On-Demand, High Performance Cushioning With Optimum Flexibility!

- **Excellent Cushioning Performance** – Equivalent to our outstanding barrier Bubble Wrap® material.
- **Long Lasting Performance** – Maintains superior air retention and consistent cushioning throughout the entire shipping cycle. Meets "creep" requirements under mil. spec. PPP-C-795D.
- **Versatile** – Applications include cushioning and/or where cushioning/void fill is required in the same pack.
- **Holds Up Under Pressure** – Passes altitude performance tests for ground and air shipments.
- **Cost-Effective** – Inflated 3/4" height Barrier Bubble® cushioning requires less material to pack the same items versus competitive cushioning material.

THE INSTASHEETER™ SYSTEM

Centralizing your packaging operation for increased throughput

The Instasheet System is ideally suited for online and work-cell packaging applications. It provides overall savings and increased productivity, especially when integrated with other automated packaging equipment - such as case sealers, carton erectors and centralized weighting systems.

The benefits are:

- Streamlined product flow
- Simplified job functions and job training
- More efficient material handling
- Facilitates just-in-time packaging

Versatile

Converts all Sealed Air wrap products into custom cut sheets: bubbles, PE foam, and paper products in thicknesses from 1/32" to 1/2" and widths up to 24". Changes easily from one packaging material to another with no adjustments.

Efficient and Labour Saving

Produces up to 50 ready-to-use sheets per minute. Operator can pack directly from Instasheet into a box, resulting in more packs per hour with fewer people.

Controls Material Costs

Computerized control panel can be programmed for batch mode or pre-selected sheet size thus eliminating waste and controlling material cost.

Just-In-Time Packaging

Provides packaging materials on demand and on-site, saving storage space, reducing inventory, and improving production efficiency at the packaging station.

Give us the opportunity to streamline your packaging operation. Call your Metric consultative sales representative to schedule a video presentation or system demonstration.
