

# CARTON PROCESSING EQUIPMENT

## CARTON PROCESSING ALL WRAPPED UP!

When you select Interpack® carton sealers, you know you are receiving high-quality, versatile machines that can perform a wide range of applications.

- Our carton sealers can be configured to meet the needs of virtually all applications: from narrow & wide, to light & heavy cartons, as well as processing underfilled and overfilled applications.
- Multi position tape indexing system (PATENT PENDING) is designed for high speed processing up to 40 cartons per minute. Ideally suited for food and other high volume industries.
- IPG stainless steel construction is engineered to handle the adverse conditions of washdown operations, providing years of reliable use.
- The Bottom Belt Drive system processes cartons as low as 2" tall and features self centering side rails which makes carton width adjustment effortless.

Intertape Polymer Group™ is an industry leader in the manufacture of both tape and packaging equipment. IPG's Interpack® brand of carton sealers offer an expanded line of machines specifically designed to meet all your corrugated carton processing needs. Choose from one of our four families of machines.

IPG's complete line of semi and fully automatic case sealers, offer heavy duty construction with unmatched quality and durability. Oversized models, a variety of drive styles and other options available. All machines feature HSD® 2000 Series Tape Heads.

### Standard Options

To complete the solution, Interpack offers the widest variety of standard options in the industry. An option may provide mobility or assist case packing. It may control the flow of cases, help process heavy cases or let you know when to change the tape roll.

Interpack™ can provide them all, but better still, if you need an option that is not standard, we can custom build one from our special application group. Interpack Options are readily available, easy to install and pay for themselves in a short period of time.
