

## **Sealed Air** **PRIORITYPAK™**

### A High-Speed System Solution That Encapsulates Products In A Ready-To-Ship Protective Package

### Automated Packaging System

Easy to Use, Versatile Cold Seal® Cohesive Packaging Enhances Productivity

#### The Integrity of Cold Seal® Cohesive Packaging

The PriorityPak™ system encapsulates your products in a Cold Seal® cohesive-coated protective package that locks and seals products in place to minimize shifting; providing superior product protection from the rigors of shipping and handling.

#### Dramatically Increase Productivity

Depending upon product length, the PriorityPak™ system can create up to 20 packages a minute, compared to only 1-3 packages a minute by manual methods. This shortens the packaging process and maximizes your use of labor.

#### Choose The Right Material For Your Application

PriorityWrap™ Bubble Laminate provides strong, yet lightweight, protection. It is best for odd-shaped items or products in need of maximum cushioning and surface protection, like cosmetics, pharmaceuticals, CDs and DVDs.

PriorityWrap™ Rigid Board utilizes our patented XRS Roller System creating a crescent seal that suspends the product, minimizing product shifting and providing additional corner protection. Ideal for flat, evenly shaped item, like books and calendars.
