

WASHROOM CARE – TISSUE DISPENSING

JUMBOMATIC TISSUE SYSTEM

Designed for both medium and high traffic washrooms, as well as lower traffic washrooms. Jumbomatic is dispensed from the P-11 Jumbomatic dispenser. Its large capacity helps reduce labour costs. It has an integrated stub roll holder which eliminates waste. The transparent cover allows for paper monitoring. It is easy to load.

MEGAMATIC TISSUE SYSTEM

The side-by-side alternative to Jumbomatic. This unit holds 2, single ply 732m (2400') rolls, or 2, double ply 366m (1200') rolls. A sliding panel prevents access to the spare roll until the first roll is used up.

The P-3 dispenser is the alternative for lower traffic washrooms. It features a double roll capacity to reduce refill frequency. Automatic core ejection for efficient disposal of the core.

The new P-4 dispenser is designed for the new 750 sheet, 2 ply tissue.

PRODUCT	SPECS	PKG	CODE	ITEM NUMBER
A P-11 Dispenser	15.25" H x 11" W x 6.25" D	1	412111	PK-MI-DI-2007
