

EDGEBOARD

Edgeboard and Edge Protectors are made from several plies of paperboard that are glued, treated and formed into a rigid right angle.

Edgeboard serves to protect edges of pallet loads and adds stacking strength to packages. Edgeboard is used to reinforce packages both externally and internally. It is also used for unitizing and stabilizing pallet loads.

Edgeboard is available in various lengths and calipers. Edge protectors range from 2-1/2" (63.5 mm) to 11.5" (292 mm) in length and are boxed and sold per thousand pieces. **Edgeboard** is available up to 228" (579.1 mm), is palletized, and sold per thousand linear foot/1000 m.

A significant freight savings can be achieved by combining edgeboard with steel and/or plastic strapping.

DUNNAGE BAGS

Dunnage Bags eliminate voids, prevent shifting and abrasion for all types of shipments in containers, railcars and over the road trailers.

Dunnage bags are the economical blocking and bracing tool for today's shippers. A standard air hose fills the lightweight bags quickly and easily. We stock a variety of bag sizes to suit your individual needs.

Shippers Benefit

- Inflatable dunnage is economical – saves time, labour and materials
- Prevents damage in tailgate area
- Safe and trouble free – lightweight and easy to use
- Expedites shipping – no need for special damage-free truck trailers

Receivers Benefit

- Inflatable dunnage can be easily removed
- Fewer freight claims and less paperwork because cargo arrives in good condition
- Safer because there's no hazardous lumber or nails to remove
