

FILL AIR™ INFLATABLE PACKAGING SYSTEM

Efficient On-site, On-demand Production of Lightweight Air Cushion Packaging

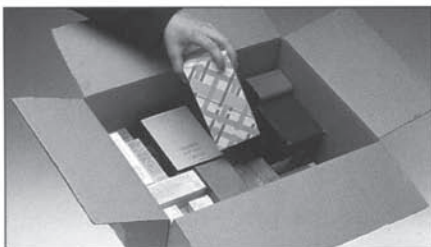

The Fill-Air™ System quickly converts compact rolls of specially formulated tubular material into continuous, perforated chains of air-filled cushions.

Fill-Air™ cushions can be produced in a wide range of sizes which provide numerous benefits to your packaging operation including:

- On-Demand Packaging - delivers air-filled cushions when you need them. No need for storage bins or bulky containers.
- Versatile - inflated cushions are excellent for a wide variety of void fill and light duty cushioning applications.
- Saves Valuable Warehouse Space - one compact Fill-Air 10" wide roll yields up to 375 cu. ft. of dunnage - the equivalent of twenty-eight 14 cu. ft. bags of loose fill.
- Easy To Use - just tear off the desired number of cushions and pack into place.
- Fast - produces up to 5 cu. ft. of dunnage per minute.
- Clean - no loose fill mess or dusty paper for you or your customers to clean up.
- Lightweight - reduces shipping costs.
- Outstanding Protection - provides maximum protection using minimum material. Your products travel securely and well protected, surrounded by a cushion of air.
- Enhanced Customer Satisfaction - your customers receive their goods in perfect condition, in clean, professional looking packages.
- Environmental Benefits - inflated cushions can be reused numerous times. Deflated cushions occupy only 1% of their inflated volume and can be recycled at Sealed Air facilities.

Fill-Air Material Roll Sizes		
Product #	Roll Width	Roll Length
FA-200	8"	1,800'
FA-250	10"	1,800'

Step 1: Group your products in the carton to make room for the Fill-Air cushions

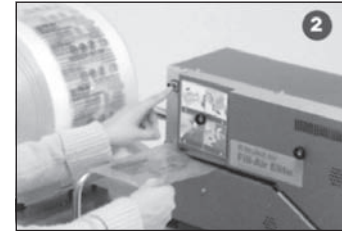

Step 2: Once the desired cushion size is selected, tear off as many inflated cushions as needed.

Step 3: Pack the cushions around your products and seal the carton.

Sealed Air FILL-AIR™ INFLATABLE PACKAGING SYSTEM

FILL-AIR Elite™ ... The Fast, Flexible Packaging System

Easy 2-Step Roll Change!

1: Slide off empty roll of film onto mandrel and screw on end cap. Place the mandrel into the roll cradle.

2: Feed the edge of material into the system and push feed switch to begin the inflation process.

Increase Cushion Output For Multiple Workstations!

- **Compact And Versatile!**
Fits into any packaging area (single or multiple workstations).
- **Easy to Use!**
Quickly inflates cushions from a continuous roll of perforated film. Minimal training required.

- **Automated Inflation Process!**
Footswitch or photoeye signal guarantees a supply of cushions.
- **All Electric – Easy to Install!**
Just plug into a standard 110-Volt outlet to make inflated cushions. No shop air required.

Sealed Air

FILL-AIR® NTS Table Side Packaging System

Compact, Portable Table Side Convenience

Fits easily into any packaging area, beside or behind the workstation, freeing up valuable work space.

Easy To Use

Automatically inflates cushions from a continuous roll of pre-perforated film. No adjustments, just turn it on and let it run. Minimal training required, perfect for today's dynamic workforce.

All-Electric – Easy To Install

Just plug into a standard 110-volt outlet to make inflated cushions. No shop air required.

Automated Inflation Provides Cushions On Demand

The auto-replenishment mode automatically keeps the cushion bin full, ensuring cushions are readily available when packers need them.

Assured Customer Appeal

Clear inflatable cushions create clean, neat packages. No messy and bulky void fill materials
